

LIFESTYLE®

- ✓ New Zealand grown and made
- ✓ Fresh natural fibre for all grazing animals
- ✓ Contains more moisture than traditional feeds and therefore keeps animals better hydrated
- ✓ Good levels of protein and digestible energy
- ✓ Can be fed on its own as a complete feed or added with other feed sources

Fiber Fresh LIFESTYLE® is a safe, natural, healthy, consistent, nutritious fibre choice, suitable for all grazing livestock.

LIFESTYLE® is a moist, highly digestible blend comprising specially grown legumes and grasses. It is high in dietary fibre, low in soluble carbohydrates and is known to facilitate gut function and better overall digestive health in grazing animals.

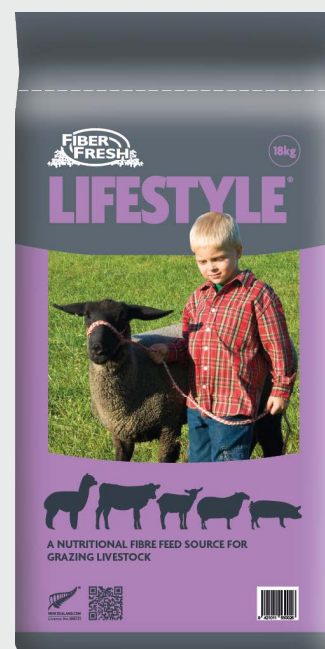

LIFESTYLE® is a well-balanced multi-forage fibre providing good levels of digestible energy, protein and naturally occurring minerals. **LIFESTYLE®** is ideal as the primary forage feed to aid in the management of digestive health in grazing livestock. **LIFESTYLE®** can be fed alongside or substituted for fresh pasture/hay feeding or mixed with concentrate feeds. It is a

common-sense fibre choice for all grazing livestock and those that are convalescing or recovering from surgery, and when a calm and steady demeanor is required.

Feeding Recommendation

LIFESTYLE® can be fed on its own or used where hay or pasture quantity and/or quality, is compromised. The remaining diet must then be balanced according to the quality and composition of the forage fibre and the physiological demands of the animal e.g. growth, lactation, protein etc.

When introducing to the diet, increase daily amounts by 0.5kg increments until the desired quantity is reached or as per the recommended feeding rates for each animal species.

RAW INGREDIENT COMPOSITION:
Speciality grasses consisting of 70% Fescue, clover red and white, 30% lucerne

TYPICAL ANALYSIS Dry Matter Basis

CRUDE PROTEIN %	20.0
NDF %	47.0
CRUDE FAT %	3.0
SELENIUM mg/kg	<0.02
DIGESTIBLE ENERGY DE MJ/KG	11.0
