

## Fiber Fresh Fiber Boost<sup>®</sup>

Convenient Fibre and Grain,  
High Energy Performance feed.

- Fresh cut Lucerne and freshly kibbled Barley
- Builds top-line and condition
- Balanced fibre with grain, superior proteins and amino acids for growing horses.

**Everyday Superfood  
for Optimal Growth  
and Condition**

## Everyday Superfood for Optimal Growth and Condition

- **FiberBoost®** is an Oat free, specifically formulated feed comprising **fresh cut Lucerne** and **freshly kibbled Barley**, mixed in the correct proportions, of fibre:grain being a 2:1 ratio by weight. This ratio is ideal to increase saliva production, slow intake, increase digestion and metabolism of both the grain and fibre portion, plus maintains **healthy gut function** and hydration. The unique process of controlled fermentation of the Barley enhances its starch digestibility.
- **FiberBoost®** provides superior protein and amino acids for growth and development required in young horses, equine athletes and those requiring a conditioning feed or topline boost. The balance of protein and highly digestible slow-release energy makes it ideal for stallions, broodmares, youngsters and sport horses needing a safe, high energy performance feed.
- **FiberBoost®** is the highest energy / calorie product within the Fiber Fresh range. It is therefore ideal to maintain body weight in older horses.

### FIBRE BOOST® FEEDING RECOMMENDATION

- When planning a diet, the most important consideration is that a horse must receive an absolute minimum of 1.5% of its bodyweight in forage fibre – e.g. Fiber Fresh and/or hay, pasture per day. The remaining diet must then be balanced according to the quality and composition of that forage fibre and the physiological demands of the horse e.g. growth, lactation, extra energy for exercise, protein etc.
- When introducing **FiberBoost®** to the diet increase daily amounts by 0.5kg increments until the desired quantity is reached or as per our recommended feeding rates.
- We recommend feeding a minimum of 2kg per day, but there is no limit on how much **Fiber Boost®** can be fed.
- Feeding **FiberBoost®** at the correct ratio increases the digestibility of concentrates by 20-30%, therefore the daily amount of concentrates can be reduced. How much to reduce this by will depend on the individual horse and can be reviewed by regular condition scoring.
- Most sport/race horses do best on 4-6kg of **FiberBoost®** per day in addition to added energy such as grains/concentrate feeds/balancer pellet and fat/oil.

For horses that require a conditioning, slow-release, high energy performance feed.

- Fresh cut Lucerne and kibbled Barley to optimise digestive health.
- Builds top-line and condition.
- Superior protein and amino acids for young growing horses.

### TYPICAL ANALYSIS (Dry Matter Basis)

CRUDE PROTEIN	14.0%
ACID DETERGENT FIBRE (ADF)	15.0%
NEUTRAL DETERGENT FIBRE (NDF)	23.5%
CRUDE FAT	3.3%
CALCIUM	8.0g/kg
PHOSPHORUS	3.0g/kg
SODIUM	7.5g/kg
VITAMIN E	111mg/kg
SELENIUM	0.02mg/kg
LYSINE	8.0g/kg
METHIONINE	2.4g/kg
CYSTEINE	2.4g/kg
STARCH & SUGARS (Not suitable for a low sugar diet)	
NUTRITIONAL JUICES (AS FED)	45%
<b>DIGESTIBLE ENERGY (DE)</b>	<b>13.0Mj/kg</b>

### RECOMMENDED DAILY FEEDING RATES

For general health (as fed)

LIGHT WORK (resting/pleasure)	1kg - 3kg
MODERATE WORK (showjumping/dressage/eventing)	2kg - 6kg
HEAVY WORK (racing, endurance)	4kg+
GROWING HORSES AND PREGNANT MARES	2kg - 6kg
BREEDING STALLIONS	3kg - 6kg
LACTATING MARES	4kg+

**Feeding Tip:** For over-zealous eaters break up your **FiberBoost** to reduce issues associated with horses that 'bolt their feed'.

**NOTE:** The land from which the Fiber Fresh forages are harvested is predominantly volcanic soil. This means very occasionally, small particles of pumice can be found in the Fiber Fresh products. Equine prehension of feed is very selective. Therefore, horses will discard and not ingest pumice particles if found in their feedbowl.

Every endeavour via best practice crop management/harvesting in conjunction with QMS are deployed at Fiber Fresh to keep inclusion of pumice in our products to an absolute minimum.
