

GAIN®

- ✓ Fresh cut lucerne and freshly kibbled barley with a vitamin and mineral supplement
- ✓ Develops bigger, healthier, productive calves and other ruminants
- ✓ No weaning check
- ✓ High energy: ME - 12.2MJ/kg

High nutrition fibre for ruminants

Fiber Fresh GAIN® is a high energy fibre/feed combination of fresh cut lucerne and freshly kibbled barley designed to give calves and other ruminants the best possible start to be healthy and more productive. The high nutritional fibre in *GAIN®* encourages full stomach development and promotes rumen growth whilst at the same time improving enzyme activity and establishing correct gut microflora (bacteria) populations.

In seven weeks calves are physically more developed and ready to graze like mini cows with no weaning check. Other ruminants will also advance quickly on

GAIN® and will be able to be introduced to pasture within a shorter timeframe. The fibre in *GAIN®* is highly digestible containing superior protein for better health and general ruminant advancement.

The kibbled barley is captured fresh from our fields in the Central Plateau. The unique fermentation process makes it extremely digestible and provides high energy for sustained growth. Calves and other ruminants find *GAIN®* highly palatable. It is easy and convenient to use, cost effective and will condition animals for optimal health and performance.

Ingredient Composition: Lucerne (alfalfa), kibbled barley, cured molasses, vitamin and mineral supplement.

TYPICAL ANALYSIS Dry Matter Basis

CRUDE PROTEIN	16.0%
CRUDE FAT	3.5%
CRUDE FIBRE	14.0%
CALCIUM	9.4g/kg
SELENIUM	0.82mg/kg
SODIUM	8.1g/kg
METABOLISABLE ENERGY (ME)	12.2MJ/kg
NUTRITIONAL JUICES (AS FED)	45%

The Metabolisable Energy (ME) values are calculated by a registered laboratory from an equation and are not measured in-vivo or in live animals. Therefore they are only a guide for predicting the energy content of a feed.

Fiber Fresh products are available from quality equine and rural suppliers nationwide.
