

# FiberMeadow<sup>®</sup>

Health & Digestibility

## EVERYDAY SUPERFOOD FOR OPTIMAL HEALTH AND DIGESTION

*FiberMeadow* is a nutritious and cool-energy fibre supplement to complement every equine feeding regime. It is produced from 100% natural high-quality NZ pasture grasses, and perfectly ensiled to optimise palatability and preserve its quality nutrients.

*FiberMeadow* is a very digestible fibre source, vacuum sealed to enhance nutritional quality and freshness.

*FiberMeadow* is perfectly ensiled to optimise palatability and preserve all

quality nutrients. Being completely dust-free with a high moisture content, *FiberMeadow* is ideal for horses with respiratory conditions. This helps to keep horses hydrated and enhances palatability.

When added to your regular hard feed, *FiberMeadow* contributes to the horse's daily fibre requirement. It slows feed consumption and encourages chewing – all attributes that benefit equine gastric and digestive health.

A highly digestible cool energy fibre, perfectly ensiled to optimise palatability and preserve nutrients

- 100% natural, high quality permanent pasture ensiled under optimum conditions
- Very digestible fibre source
- Ideal for horses with respiratory conditions.
- Slows feed consumption and encourages chewing

### TYPICAL ANALYSIS Dry Matter Basis

CRUDE PROTEIN	12.0%
ACID DETERGENT FIBRE (ADF)	34.7%
NEUTRAL DETERGENT FIBRE (NDF)	57.7%
CRUDE FAT	3.5%
CALCIUM	6.5g/kg
PHOSPHORUS	2.1g/kg
SODIUM	1.42g/kg
SELENIUM	0.02mg/kg
DRY MATTER CONTENT	42% - 45%
SUGARS	2% - 4%
NUTRITIONAL JUICES (AS FED)	57.0%
DIGESTIBLE ENERGY (DE)	9.0MJ/kg

### RECOMMENDED DAILY FEEDING RATES For general health (as fed)

PONY	1kg – 3kg
LIGHT WORK (resting/pleasure)	2kg – 4kg
HEAVY WORK (racing, endurance)	4kg – 6kg
WEANLING/YEARLING	2kg – 4kg

**Feeding Tip:** For over-zealous eaters break up your *FiberMEADOW*, to reduce issues associated with horses that 'bolt their feed'.

*FiberMEADOW* is a safe nutritious forage option for cattle, sheep, goats, deer and alpacas.

**NOTE:** The land from which the *Fiber Fresh* forages are harvested is predominantly volcanic soil. This means very occasionally small particles of pumice can be found in *Fiber Fresh* products. Equine prehension of feed is very selective. Therefore horses will discard and not ingest pumice particles if found in their feed bowl.

Every endeavour via best practice crop management/harvesting in conjunction with QMS is deployed at *Fiber Fresh* to keep inclusion of pumice in our products to an absolute minimum.
